Sun God says...

SIGNS OF ALCOHOL POISONING

IF YOUR FRIEND IS:  
Responsive, but sluggish and sleepy  
Passed out, but can be woken up  
Not responsive, or vomiting while not responsive, or breathing irregularly, or bluish in skin tone

YOU SHOULD:  
Put them on their side, give water, and stay with them.  
Put them on their side, give water, and stay with them—if anything changes, call for help!  
Call 911 or (858)534-HELP (4357)  
Take action!

NEVER leave a friend alone!  
NEVER hesitate to call for help!

Sun God says...

**IF YOUR FRIEND HAS ANY OF THE FOLLOWING:**

- weird behavior, acting dramatically different than the person you know
- high body temperature & dry skin
- very rapid heartbeat
- can’t walk on their own or hold themselves up

**YOU SHOULD:**

STAY WITH THEM and Call 911 or (858) 534-HELP (4357)

Take action!

NEVER leave a friend alone! NEVER hesitate to call for help!
